Delivering Value!

Thaw Assistance:
Our travelling embryologist will assist with the first thaw

protocol at your location and our cost

Greetings!

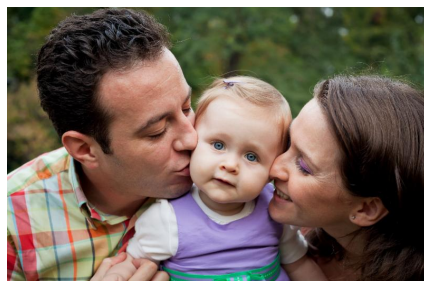

The World Egg Bank (TWEB) recently celebrated our one year anniversary in our own state of the art facility where we retrieve all our egg donors. It has been a huge success with unsurpassed ova quality supported by the best in industry data. I congratulate the entire team at TWEB for their efforts during this transition, their commitment to our donors comfort, and the dedication to providing only the best for our intended parents and clinics. Together, we are setting higher standards in egg donation and in providing the assurances and support our families deserve.

TWEB is the most experienced egg bank, recruiting and screening egg donors nationwide since 1996. We have been banking cryopreserved oocytes since 2004 and shipping to over 20 countries since 2007. Our experience and reputation speaks for itself with proven results and exceptional customer service.

We have over 450 egg donors available for Custom Choice™ cycles and over 2000 frozen eggs already banked and available for immediate shipment. Recipients can view complete donor profiles at no charge and our Client Representative is available to answer questions or to assist intended parents in the important process of donor matching.

We hope you enjoy our June Newsletter and look forward to helping create families worldwide!

Best Regards,
Diana Thomas, Founder & CEO
The World Egg Bank

Assurances and Guarantee Like No Other!

The World Egg Bank offers recipients a guarantee that is honest, realistic and demonstrates that we stand behind our one of a kind quality control systems to ensure consistent outcomes. No additional costs, no pre-qualifying tests, and no gimmicks. Our singular focus on egg banking and in-house retrieval center combined with our expert staff, ensures that you receive the very best quality and value

in the industry.

Included in out costs, The World Egg Bank offers a guarantee of one embryo with a minimum of 6 ova, or you receive a replacement cohort of 6 ova for free. It is very important to us that you feel comfortable in your decision

when choosing The World Egg Bank. Our guarantee is designed to give you peace of mind and make your process easier.

The World Egg Bank is the only egg bank that can ensure you receive the very best, consistent quality donor ova. We know this because we manage all of our donor recruiting, screening, stimulation, egg retrievals, vitrification, and shipping from our one of a kind medical facility that focuses solely on egg donation. We do not contract out to 'network' or 'affiliate' IVF clinics. We stand behind all of our administrative, clinical, and laboratory operations because the same experienced, highly-skilled staff does all of our work at our own facility.

Other Guarantees:

Some Egg Banks may offer guarantees that sound amazing, be aware that many of these guarantees come with strict qualifying criteria and high up front commitments and costs. It can be emotionally enticing to believe that these alternative guarantees will result in a take home baby but often individuals are not able to qualify against the strict medical criteria.

For more information, visit www.theworldeggbank.com.

Experienced Management Team:

Management team with best in industry experience in IVF

Compliance:

Passed all FDA audits for over 10 years and international governmental audits in the UK and Australia

Additional Quality Assurance With In House Shipping Fleet

The World Egg Bank is excited to announce further total quality assurance with the addition of our own, in house fleet of shippers for the transportation of our banked eggs. By bringing the shipping fleet in house, we are now able to completely control the process through a combination of tracking software and quality and safety controls in the shippers.

The World Egg Bank ships eggs throughout the United States, Canada, Europe, Australia, South and Central America. We have the longest, most experienced tradition of successfully navigating the complex interactions associated with customs and the import of eggs, embryos and sperm. We work with several dedicated shipping partners guaranteeing your package is in the safest hands, no matter what corner of the globe you reside in. Every tank that leaves our laboratory is outfitted with a temperature data logger to monitor the interior environment of the tank from door to door. Our laboratory staff controls maintenance of the shippers, rigorously and regularly testing them to ensure that only those tanks are capable of holding their charge for more than 20 days. This level of control is just one more way The World Egg Bank has you and your future family at the core of what we do.

TWEB On The Move

Think your clinic would benefit from a visit from a TWEB staff member? Let us know and we'll come to you!

Introducing Dr. Luis A. Murrain Jr., M.D.

The World Egg Bank is excited to introduce our new Medical Director, Dr. Luis A. Murrain Jr., M.D., D.O., FACMG, FACOG.

Dr. Murrain has joined TWEB as the Medical Director. In this role, he is responsible for all egg donor monitoring and retrievals ensuring TWEB's proven quality, outcomes, and extraordinary egg donor care

Dr. Murrain has been helping men and women realize their dream of building a family using 24-chromosome genetics testing of infertility and treatment for over a decade. "It is an exciting time in the Fertility Industry with the advancement and impressive outcomes seen specifically with the use of donor eggs. The World Egg Bank's data is remarkable and I look forward to being part of their recent expansion to a singular focus, state of the art retrieval center", said Dr. Murrain.
